

TWINBROOK FARM

(WORTHINGTON)

RINGVILLE, P. O.

MASS.

Oct 22. 22

My dear Clarke:

On my return from town I have yours of Oct 17, - since when also you seem to have been having a halcyon time at Scheney with the Old Man. I wrote the first article on the old Edison G. E. works, when there were 700 employees, and I will had the article reprinted in excursions style. I must look it up, for now it has "contemporaneous" interest, in view of these later happenings.

Your suggestions are very
admirable as to the "Memorial"
I am quite with you. if they do
anything about it. I have no
official status in the Pioneers or
the Assn Edison Ill Co, so cannot
very well take the initiative.

Your reminiscences as
to the old locomotive are
profoundly interesting - real
history. I often wish we had
an Elec. Historical Society to
publish such notes and memoirs;
but the art is still moving
forward at such a fierce rate,
nobody seems to care much
about the pieces or have time
to pick them up. The success of the
recent Exhibit pleases me very
much.

Yours truly

T. Martin
